

AQUA MAG® blended phosphate is the premier corrosion inhibitor and sequesterant for use in potable and industrial water systems. The product is a liquid concentrate of exceptional purity, clarity, and stability utilizing a broad spectrum of phosphates for better sequestering and corrosion control.

BENEFITS OF AQUA MAG

- **Inhibits corrosion of steel distribution system water lines, iron and galvanized piping, and lead and copper plumbing**
- **Decreases iron tuberculation to extend the life of the distribution system**
- **Inhibits lead and copper leaching resulting in lower lead and copper levels in the delivered potable water**
- **Minimizes the occurrence of microbial-influenced corrosion providing longer life system**
- **Controls iron and manganese minimizing rusty and dirty water in the system**
- **Reduces discoloration, staining, and mineral build-up resulting in fewer customer complaints**
- **Diminishes calcium scale deposits typically seen in hot water lines and heaters**
- **Saves money by reducing corrosion and scale; lowering chlorine demand and decreasing hydrant flushing, leaks, and failures**
