CARULITE® 110-TR CATALYST

FACT SHEET

CARULITE® 110-TR catalyst is used to effectively destroy volatile organic compounds (VOC) such as flexographic and rotogravure solvents. Although CARULITE 110-TR catalyst operates at low temperatures, (600°F (315°C)), it has an upper temperature stability limit of 1300°F (704°C), providing excellent process flexibility.

PARTICLE SIZES AVAILABLE
1-2 mm diameter sphere (nominal)
2-4 mm diameter sphere (nominal)

CHEMICAL/PHYSICAL DATA
- Formula: Manganese/copper oxide/anthanum oxide catalyst
- Appearance: Black/dark brown spheres
- Surface Area ≥ 170 m²/g
- Weight Loss < 3%
- Upper Temperature Limit 1300°F (704°C)

SUGGESTED OPERATING CONDITIONS
- Vertically-oriented vessel with top-down air flow
- ≤ 15,000 hr⁻¹ Gas Hourly Space Velocity
- ≥ 3 ft/sec (0.91 m/sec) Linear Velocity
- Minimum inlet temperatures 600°F (315°C)

APPLICATIONS
- Flexographic and rotogravure printing
- Metal decorating
- Laminating plastic and paper
- Coating chemical processes

CATALYST POISONS
Minimize or avoid contact with: sulfur compounds, halogenated compounds, heavy metals, and silica.

SHIPPING CONTAINERS
CARULITE 110-TR catalyst is shipped in 20 kg net weight pails.

HANDLING, STORAGE, AND INCOMPATIBILITY
Although CARULITE 110-TR catalyst is not a hazardous substance, it should be handled with care. Protective equipment in handling should include safety glasses or goggles and rubber or plastic gloves. In cases where high dust exposure may exist, the use of NIOSH-MSHA dust respirator or an air-supplied respirator is advised.

The product should be stored in a cool, dry area in a closed container. Segregate from easily-oxidizable materials, peroxides, chlorates, and acids. Protect container against physical damage. Spillage should be collected and disposed of properly.

DISPOSAL
Unused CARULITE 110-TR catalyst is not considered a hazardous waste under U.S. 40 CFR 261. Dispose of used CARULITE 110-TR catalyst in a landfill approved to accept chemical waste, after verifying that it is not contaminated with hazardous substances through usage.

CARUS VALUE ADDED

LABORATORY SUPPORT
Carus Corporation has technical assistance available to its potential and current customers to answer questions, evaluate applications alternatives or perform laboratory testing. Our laboratory capabilities include: catalyst analysis, performance testing, process evaluations, and analytical services.

TECHNICAL SERVICES
As an integral part of our technical support, Carus provides in-house and on-site assistance. We offer full application services, including technical expertise, design recommendations, and follow-up support.

CARUS CORPORATION
For over 98 years, our dedication to research and development, technical support, and customer service has enabled Carus to become the world leader in permanganate, manganese, and catalyst oxidation technologies. Call Carus for assistance with specific applications.
